

# MinJun Chang

minjunchang@gatech.edu | 470-581-5124 | Website | LinkedIn

## Education

- Georgia Institute of Technology**, PhD in Civil Engineering Aug 2025 - Current
- Robotics and Intelligent Construction Automation Laboratory
  - **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory
- Yonsei University**, BS in Mechanical Engineering Mar 2019 - Feb 2025
- GPA: 3.3/4.3
  - **Coursework:** Mechatronics, Mechanism Design, Dynamics

## Research

- RICAL Group**, Georgia Institute of Technology – Atlanta, GA Aug 2025 – Current
- Graduate Research Assistant, Supervisor: Dr. Yong K. Cho
- Deep-Learning based human motion recognition with minimal sensor attachment and real-time inference with zone localization in construction
  - Whole body control of humanoid for dexterous tasks in construction and manufacture
- Dynamic Robotic System Laboratory**, Seoul National University – Seoul Jul 2024 – Dec 2024
- Undergraduate Research Assistant, Supervisor: Dr. Jaeheung Park
- Model-free reinforcement learning framework with state estimator neural-network for bipedal locomotion
- Machine Learning and Control System Laboratory**, Yonsei University – Seoul Jul 2022 – Jan 2023
- Undergraduate Research Assistant, Supervisor: Dr. Jongeun Choi
- Developed an enhanced localization algorithm with control input delay compensation
- Mechanobiology and Soft Materials Laboratory**, Yonsei University – Seoul Jul 2020 – Jun 2021
- Undergraduate Research Assistant, Supervisor: Dr. Hyungseok Lee
- Participated in development of portable Standing Surface Acoustic Wave cell alignment device on transparent bridge lumen structure

## Publications

- Robust Symmetric Bipedal Locomotion Development via Simultaneous State Estimator Neural Network Training**, The 20th Korea Robotics Society Annual Conference, Poster Feb 2025
- MinJun Chang*, Jaeyong Shin, Jaeheung Park
- State prediction-based control input delay compensation for autonomous driving systems**, The 18th Korea Robotics Society Annual Conference, Oral Feb 2023
- MinJun Chang*, H.W. Nam, S.Y. Choi, J.H. Yang, J.H. Yang, Jongeun Choi

## Patents and Copyrights

- Autonomous Driving Auxillary Cart Robot for Manufacture** Aug 2024
- KR10-2024-0177135, under prosecution
- The Urine Examination Apparatus and Controlling Method of the Same** Dec 2020
- KR10-2020-0176792, under prosecution
- Eye Tuner: Media Literacy Program based on Pupil Tracking by Computer Vision** Nov 2021
- Korea Copyright Commission, C-2024-039138, Registered-Active

## Corporate Experience

<b>Hanwha Systems(Space&amp;Defense)</b> , Satellite Software Engineer	Jan 2025 – May 2025
<ul style="list-style-type: none"><li>• ARMv7 MCU internal communication software programming for Small Synthetic Aperture Radar (SAR) Satellite</li></ul>	
<b>GOLE Robotics</b> , Robotics Engineer	Apr 2024 – Jun 2024
<ul style="list-style-type: none"><li>• Implemented global and local robot path planning algorithm on ROS2 for construction delivery robot WERO</li><li>• Developed actuator controller package with C++/Python binding enabling python API usage of C++ source</li></ul>	
<b>DRIMAES</b> , Embedded Software Engineer	Oct 2022 – Mar 2024
<ul style="list-style-type: none"><li>• Linux, ARM MCU software/firmware programming for various products</li><li>• Developed various communication protocols (Serial, MQTT, REST, CAN)</li><li>• Implemented multiple virtual container management technique on cross-platform systems</li></ul>	
<b>SIOT Infotech</b> , Embedded Software Engineer	Feb 2022 – Oct 2024
<ul style="list-style-type: none"><li>• Developed embedded software for Mediatek, ESP chipsets and enhanced custom OpenWRT OS kernel</li></ul>	

## Selected Awards

<b>1st place, National ICT Smart Device Competition</b> , Korean Ministry of Science and ICT	Aug 2024
<ul style="list-style-type: none"><li>• Awarded by the Minister of Science and ICT of Republic of Korea</li><li>• Led a team of 5 in developing an Autonomous Manufacture Assistant CARTRASCHE</li></ul>	
<b>1st place, 2022 Autonomous Driving Robot Racing Contest</b> , Korean Robotics Society (KRoS)	Nov 2022
<ul style="list-style-type: none"><li>• Participated as Localization team member</li><li>• Developed a control algorithm utilizing LiDAR, IMU, and GPS sensor fusion for collision avoidance</li></ul>	
<b>Selection, Hanium Contest</b> , Federation of Korea Information Industries	Nov 2021
<ul style="list-style-type: none"><li>• Led a team of 4 in developing Personalized Content Literacy program EYE-TUNER</li><li>• Implemented pupil tracking algorithm for the program</li></ul>	
<b>2nd place, Medical Hack 2021</b> , Busan City	Nov 2021
<ul style="list-style-type: none"><li>• Awarded by the mayor of Busan City</li><li>• Implemented posture prediction algorithm with multiple load-cell sensors</li></ul>	
<b>2nd place, Yonsei IHEI Workstation</b> , Yonsei University	Jul 2020

## Projects

<b>Awaresite : Intelligent PPU System for Construction Productivity and Safety</b>	Aug 2025 - Current
<ul style="list-style-type: none"><li>• Deep-Learning based worker motion recognition using IMU data</li><li>• Zone scale indoor localization using BLE beacons</li></ul>	
<b>CARTRASCHE: Autonomous Driving Auxiliary Cart Robot</b>	Mar 2023 - Jul 2024
<ul style="list-style-type: none"><li>• Developed autonomous driving mobile robot with rotating shelf system using SLAM for navigation in ROS</li><li>• Implemented custom RC filter and encoder-less motor control algorithm for activation</li><li>• Managed the project flow and system overall management</li><li>• Tools Used: C++, Python, ROS, LinuxOS</li></ul>	
<b>UAV Fleet Management System for Robot Cluster in Factory</b>	Aug 2023 - Dec 2023
<ul style="list-style-type: none"><li>• Implemented task scheduling and allocation algorithm based on order status for multi-robot network</li><li>• Tools Used: Python, ROS, MQTT</li></ul>	
<b>FennecBot: Industrial Anomaly Detection Mobile Robot</b>	May 2023 - Aug 2023
<ul style="list-style-type: none"><li>• Developed multi-modal deep learning network for pipeline anomaly detection and the classification of pipeline leakage using RGB camera, and ultrasonic/acoustic sound camera</li><li>• Operated on Scout mini with line-tracing algorithm detecting pipe leakage within Hyundai HI. factory</li></ul>	

## Honors

---

<b>Federico Stubbe Graduate Student Fellowship</b> , Georgia Institute of Technology	Aug 2025
Fellowship granted to competent graduate students	
<b>Next Generation Engineer</b> , Institute for Promotion of Engineering and Science of Korea	Dec 2024
Honor society for outstanding young engineers in Republic of Korea	

## Technologies

---

**Programming:** Python, C++, C, JavaScript, MATLAB

**Frameworks/Tools:** ROS, IsaacSim/Lab, PyTorch, Docker, AWS, FastAPI, Solidworks, Fusion360

**Hardware:** ARM V7, Jetson Xavier, Jetson Nano, RaspberryPi, Arduino, STM32, ESP32, Unitree Go1

**Languages:** Korean(Native), English(Fluent), Japanese(Median)
